Tplinkwifi.net can be use to configure a Tplink router. To utilize tp-link login, you must log in to your router. You can access Tplinklogin whether you connect wirelessly or with an Ethernet cable. You are not connected to your TP-Link network, according to **tplinkwifi**. Please retry after checking your network connection. Only when you attempt to access the TP Link login page or when setting up a TP Link will this popup show. This page provides access to your tp-link router, so you may configure your wireless router or make modifications to your router. Tplinkwifi.net can be use to access most routers, but if it's down, you'll need to use the tp link IP address. The default address is

192.168.0.1, but depending on the operational mode and type of your internet connection, it may change.

If you're connecting to the router straightly, you will be unable to access the Range Extender's management page by using <http://tplinkrepeater.net>.
